Summary

I am an energetic and proactive .NET developer and Azure cloud architect dedicated to my professional growth. I am dedicated to finding a company that allows me to contribute by building a supportive workplace, collaborating to achieve significant results, and giving me the chance of making a real difference in every project. It would thrill me if my skills are used to help, support, or make a difference to the people that really need it. I'm looking for a remote and part-time or freelance opportunity to be able to keep my nomad lifestyle.
